

Vol.1 table of contents (2008)**Vol.1 No.1****Preface**

A journal of original papers of *Type Two Basic Research* - - - H. Yoshikawa 1-6

Research papers

Mass preparation and technological development of an antifreeze protein

—*Toward the practical use of biomolecules*— - - - Y. Nishimiya, Y. Mie, Y. Hirano, H. Kondo, A. Miura and S. Tsuda 7-14

Development and standardization of accessible design technologies that address the needs of senior citizens

—*Product design methodology based on measurements of domestic sounds and hearing characteristics*—
- - - K. Kurakata and K. Sagawa 15-23

A challenge to the low-cost production of highly functional optical elements

—*Fabrication of sub-wavelength periodic structures via glass-imprinting process*— - - - J. Nishii 24-30

A strategic approach for comparing different types of health risks

—*A risk assessment of toluene exposure using quality-adjusted life years*— - - - A. Kishimoto 31-37

Technologies for the design and retail service of well-fitting eyeglass frames

—*Toward the mass customization business*— - - - M. Mochimaru and M. Kouchi 38-46

Improving the reliability of temperature measurements taken with clinical infrared ear thermometers

—*Design and establishment of a new calibration system traceable to the national standards*— - - - J. Ishii 47-60

Article

Science and society, or research institution and journal: A historical retrospection - - - M. Akamatsu and H. Iyama 61-67

Vol.1 No.2**Research papers**

Creation of seamless geological map of Japan at the scale of 1:200,000 and its distribution through the web

—*For maximum accessibility and utilization of geological information*—
- - - K. Wakita, T. Igawa, S. Takarada and Y. Fusejima 73-84(1-12)

Development of a small-size cogeneration system using thermoelectric power generation

—*Recovery system of high-temperature waste heat by new thermoelectric oxides*— - - - R. Funahashi and S. Urata 85-92(13-20)

Realization of a collaboration system for everyone to develop and manage

—*Practices of communication patterns using qwikWeb*— - - - K. Eto, M. Hamasaki and T. Nishimura 93-102(21-30)

Introduction to service engineering

—*A framework for theoretical study of the service engineering*— - - - H. Yoshikawa 103-113(31-41)

A systematic analysis of protein interaction networks leading to the drug discovery

—*Development of ultra sensitive mass spectrometry analytical platform*— - - - S. Iemura and T. Natsume 114-120(42-48)

The aerosol deposition method

—*For production of high performance micro devices with low cost and low energy consumption*—
- - - J. Akedo, S. Nakano, J. Park, S. Baba and K. Ashida 121-130(49-58)

Interviews

Hope for *Synthesiology*: Discussion with Prof. Lester - - - R. K. Lester and N. Kobayashi 131-137(59-65)

The Toyota Motor approach from basic research to product realization: Interview with Dr. Umeyama,

General Manager, R&D Management Division - - - M. Umeyama and M. Akamatsu 138-142(66-70)

Round-table talk

Round table talk by reviewers of the new journal: Reviewing papers in the new style - - - 143-149(71-77)

Vol.1 No.3**Research papers**

Development of regenerative medical technology working toward practical application

— *Construction of human cell processing system in view of safety for the purpose of clinical application* —
 - - - H. Ohgushi 155-160(1-6)

Development of highly-active hydrodesulfurization catalyst for sulfur-free diesel production

— *Full research from in-house laboratory catalyst to commercial catalyst* — - - - Y. Yoshimura and M. Toba 161-168(7-14)

Development of massive synthesis method of organic nanotube toward practical use

— *Integration of molecular design, molecular synthesis and safety assessment for materials having market competitiveness* —
 - - - M. Asakawa, M. Aoyagi, N. Kameta, M. Kogiso, M. Masuda, H. Minamikawa and T. Shimizu 169-176(15-22)

Development of flexible-printable device processing technology

— *For achievement of prosumer electronics* —
 - - - T. Kamata, M. Yoshida, T. Kodzasa, S. Uemura, S. Hoshino and N. Takada 177-186(23-32)

A new density standard replaced from water

— *Using silicon single-crystals as the top of traceability in density measurement* — - - - K. Fujii 187-198(33-44)

A rationalization guideline for the utilization of energy and resources considering total manufacturing processes

— *An exergy analysis of aluminum casting processes* — - - - H. Kita, H. Hyuga and N. Kondo 199-208(45-54)

ArticleLaunch of AIST journal *Synthesiology*

— Discussion with Japanese researchers at the University of Illinois at Urbana-Champaign —
 - - - H. Ohsaki and Y. Sato 209-215(55-61)

Vol.1 No.4**Research papers**

Development of high power and high capacity lithium secondary battery based on the advanced nanotechnology

— *The convergence innovation strategy employing the inter-disciplinary research and inter-organization straightforward technology transfer* — - - - I. Honma 221-232(1-12)

From basic research on firefly bioluminescence to *Product Realization Research*

— *Production of a multi-gene expression kit based on bioluminescent proteins* — - - - Y. Ohmiya and Y. Nakajima 233-241(13-21)

Development of clay-based-film

— *A Full Research scenario from a viewpoint of encounter* — - - - T. Ebina 242-250(22-30)

Development of a risk assessment system for soil contamination and the application to the social system

— *Processes in Synthesiology for practicing an advanced environmental risk management* —
 - - - T. Komai, Y. Kawabe, J. Hara, Y. Sakamoto and H. Sugita 251-262(31-42)

Development and applications of photocatalytic technology

— *Industrialization of sustainable eco-technology* — - - - H. Taoda 263-272(43-52)

Is an angular standard necessary for rotary encoders?

— *Development of a rotary encoder that enables visualization of angle deviation* — - - - T. Watanabe 273-281(53-61)

Article

Methodology and a discipline for synthetic research

— *What is Synthesiology?* — - - - H. Nakashima 282-290(62-70)
