

AIST Activities (Quick Reference)

7 Research Assistant Program

From among the trainees of the technical training program, AIST hires graduate students with outstanding R&D capabilities as AIST Research Assistants (contract employees). The hired graduate students participate in the national R&D projects carried out by AIST, and furthermore, they are allowed to use the research results in their degree theses. Consequently, the graduate students are able to concentrate on their research activities to pursue their degrees without facing financial difficulties.

Requirements for AIST Research Assistants

Candidates	Graduate students of master's programs	Graduate students of doctor's programs
Requirements	-R&D/abilities which can contribute to AIST's R&D projects -Ability to independently conduct the duties under the guidance of AIST employees	-Superb R&D/paper-writing abilities which can highly contribute to AIST's R&D projects -Ability to independently conduct the duties under the guidance of AIST employees
Days of employment	Avg. 4-14 days/month (Domestic students); Avg. 4-12 days/month (International students)	Avg. 10-14 days/month (Domestic students); Avg. 10-12 days/month (International students)
Compensation	1,500 yen/hour	1,900 yen/hour
Number hired (FY 2017)	266	

8 Partner Graduate School

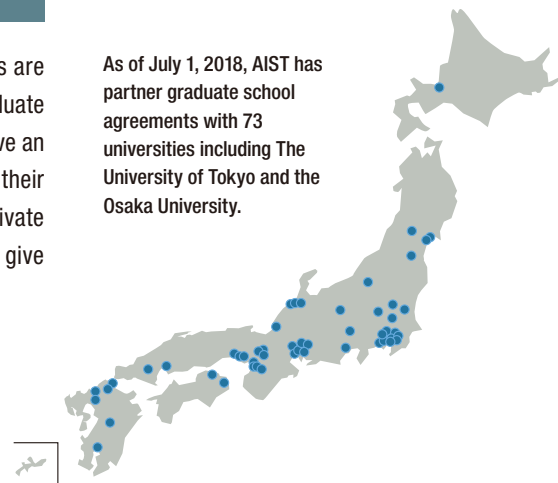

Within the framework of the Partner Graduate School, AIST researchers are appointed as guest professors at the partner schools and supervise graduate students' research activities at AIST's facilities. The graduate students have an access to the state-of-the-art research facilities at AIST to proceed with their research activities. In addition, AIST uses its research potentials to cultivate students' abilities such as by sending the researchers to the schools to give lectures there.

As of July 1, 2018, AIST has partner graduate school agreements with 73 universities including The University of Tokyo and the Osaka University.

9 Innovation School

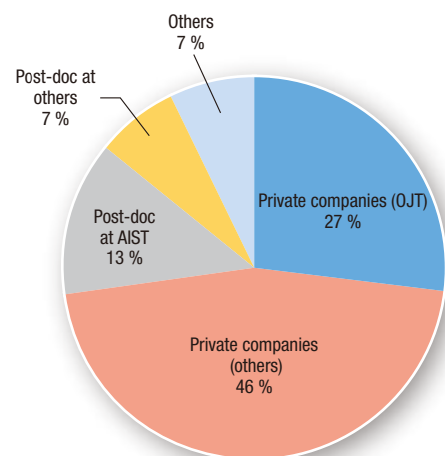

AIST Innovation School actively invites young postdoctoral researchers and students of doctoral and master's programs to develop them as human resources with broad perspective, communication skills, and cooperative attitude to work with specialists of different fields, as well as with scientific and technological knowledge of specialized disciplines. Since the school started in 2008, 292 students have completed the postdoc course, and of the 11th school graduates who graduated in 2017, 44.5% are working in private companies.

Employment of the 11th AIST Innovation School graduates (As of July 1, 2018)

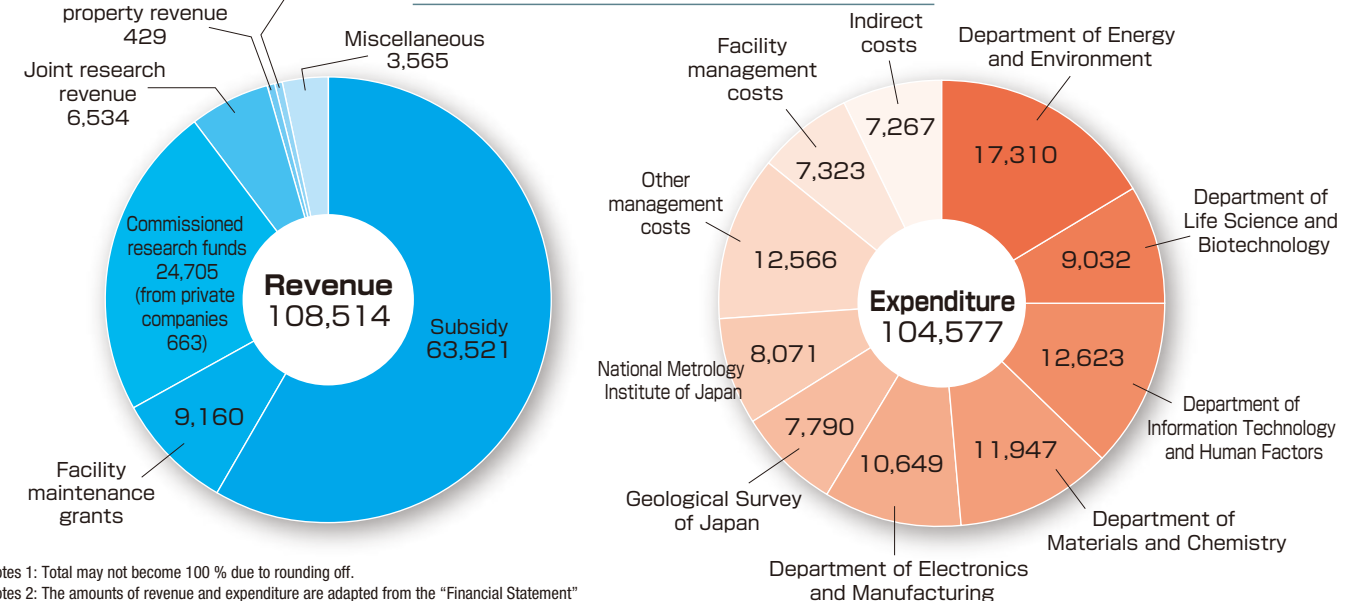

1 Employees and Budget

- Researchers (foreign nationals)2,331 (139)
 [Permanent] [1,982]
 [Fixed term] [349]
 - Administrative employees699
 - Total number of employees3,030
 - Executives (full time) 13
 - Visiting researchers 233
 - Postdoctoral researchers 243
 - Technical staff 1,549
- (as of July 1, 2018)
- Number of researchers accepted through industry/academia/government partnerships
 - Companies 1,867
 - Universities 2,446
 - Public organizations 1,043
- (Foreign nationals : 530)
(Total number of researchers accepted in FY 2017)

Composition of researchers by domain (as of July 1, 2018)

Financial results for FY 2017 (unit : million yen)

Notes 1: Total may not become 100% due to rounding off.
 Notes 2: The amounts of revenue and expenditure are adapted from the "Financial Statement" prescribed in Article 38 of the Act on General Rules for Incorporated Administrative Agencies.

2 Joint Research / Commissioned Research / Technology Consulting

Joint research is an R&D project between AIST and cooperative partners such as companies, universities, and public research institutions where the two parties share the same objectives and goals in order to generate innovative results that cannot be achieved by independent research. Commissioned research is an R&D project in which AIST conducts research commissioned by companies or other organizations. By using AIST's research potential, they can advance their research into technical areas that require technologies not available to them. Technology consulting service provides solutions to issues that cannot be solved by companies alone based on the state-of-the-art technologies and accumulated knowledge of AIST's experts of various backgrounds. 411 cases were handled in FY 2017.

- Joint research conducted in various forms
- ◇ Joint research involving employee transfer
- ◇ Joint research upon foundation of consortiums
- ◇ Joint research upon foundation of cooperative research laboratories

3 Technical Advice Service

AIST welcomes technical questions and requests of joint research not only from companies but also from academia, media, and others. The general advice desk provides answers to received questions and requests by consulting appropriate scientists at AIST, such as SCET (SEM Collaboration ExperT), innovation coordinators, and researchers. In FY 2017, this service answered to 4,208 questions and requests.

5 Technology Transfer Activities

It is AIST's mission to contribute to the development of the economy and industry by disseminating its research achievements in society. To achieve this mission, AIST develops a strategic approach to obtain intellectual property (IP) rights, and appropriately maintain and manage such IP rights so that the research achievements lead to technology transfer. In addition, AIST is strongly and powerfully promoting technology transfer centering on intellectual property.

6 Technical Training

AIST accepts researchers, engineers, and students from companies, universities, and public testing and research institutions for defined periods for technical training. This training program gives trainees an opportunity to absorb leading technology under the instruction of AIST researchers. During FY 2017, we accepted 1,584 people into this program.
